Dear Hiring Manager,

I am expressing my interest in the Chief Executive Officer (CEO) role. I received my Electrical and Electronics Engineering degree (1999), from Near East University, (Northern Cyprus) Turkey. I bring to this position more than 20 years of varied experience from a variety of industries.

I belong to a family business where mechanical work is my forte. I have worked in sheet metal parts manufacture since 50 year, when I was a small child, mainly for stationery products. Automatic die design and physical implementation using AutoCAD and equipment like wire cut, EDM machines, power presses, lathes, milling machines, drilling machines, and both gas and electric welding are among the areas of my experience. We have been Dollar Stationery (Pvt) Ltd.'s proud vendors..

In addition to my mechanical experience, I hold a degree in Electrical and Electronics Engineering. I have designed and controlled various machinery through PLC (Programmable Logic Controller) with HMI (Human-Machine Interface). Machines for packaging, dock levelers, and injection molding are some of my creations. Additionally, I've taught electronics and electrical courses.

My experience extends to refrigeration and air conditioning, where I have built electric water chillers and coolers of various sizes.

I am an active member of the TULIP group, a Turkish alumni network in Pakistan. Our members, including myself, have easy access to Mr. Cemal Sangu, the Turkish Consulate General in Pakistan. Mr. Sangu has informed us that many Turkish companies are interested in starting operations in Pakistan.

Kindly take a look at my application for the CEO role. With my broad experience and varied skill set, I'm sure I'll be a great addition to your company. I anticipate hearing from you favorably.

Sincerely,

FaridUddin
